

Kumil Energy Limited

# COMPANY PROFILE

April 2017

### **Overview**

Kumil Energy Limited is a company registered in Zambia, with a view to invest in an agriculture and renewable energy project with the sole aim of producing anhydrous fuel ethanol, electricity and cane juice from sugarcane.

The production of ethanol using sugarcane feedstock with high carbon emission saving potential and which conform to EU and international standards is highly on demand. Many existing biofuel projects, in particular those processed from corn, wheat and soya will fail to pass the barrier entry of the major ethanol importing countries because they do not meet the 50% CO<sub>2</sub> saving threshold.

### **Vision**

We are a green company that takes care of the present environment and also plans for the future by investing in renewable energy solutions.

### **Mission**

Our purpose is to create superior value for our customers, employees, communities and investors through the production, conversion, delivery and sale of renewable energy and renewable energy services.

## Company Profile

### Products

The main focus of Kumil Energy Limited will be the following:

- Production of anhydrous Ethanol for blending into Petrol and Diesel
- Production of Electricity using bagasse from sugar cane
- Production of Cane Juice

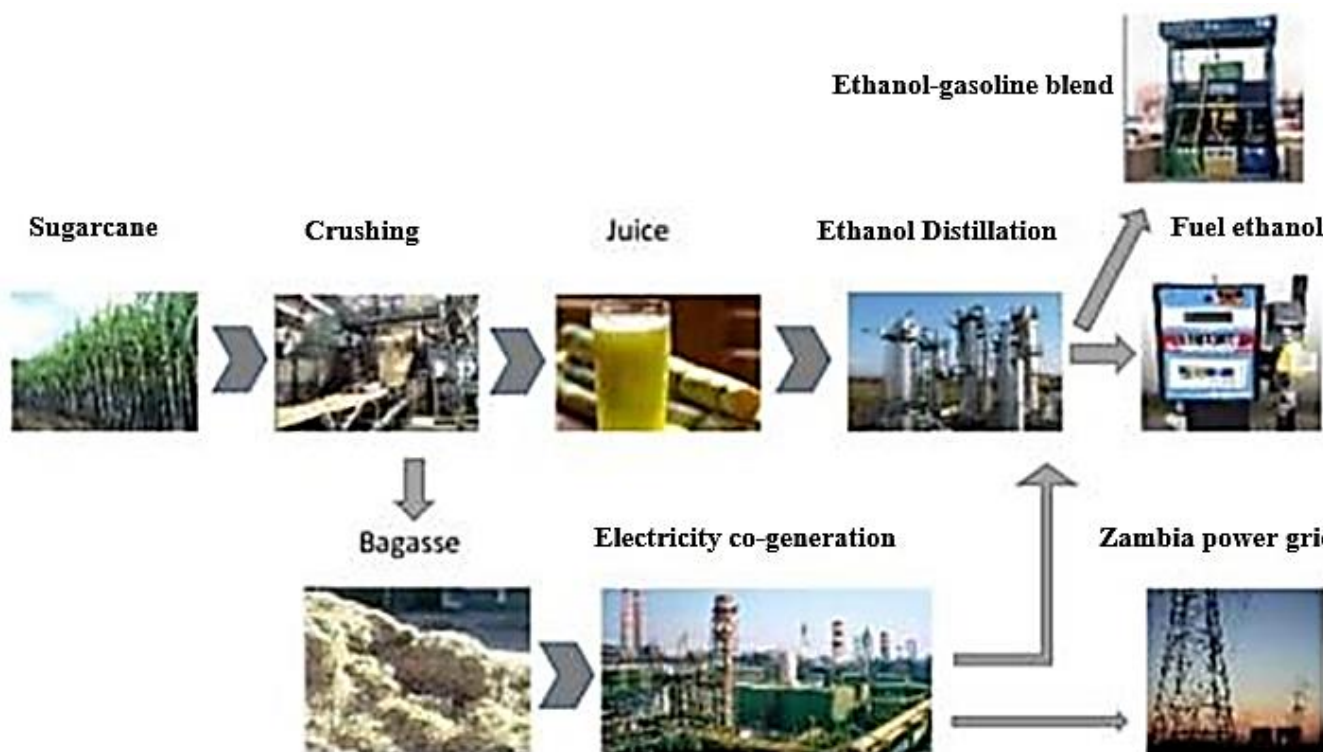

### The future is here

Kumil Energy Limited is actively exploring cutting-edge technology and alternative methods that lower the carbon footprint and increase manufacturing efficiencies. With the implementation of Low Carbon Fuel Standard regulations, we are poised to meet the increasing demand as Zambia looks for new, cleaner fuel sources.

### Corporate Governance

Kumil Energy Limited will endeavor to adhere to internationally acceptable corporate governance and ethics.

### Leadership

Kumil Energy Limited has drawn together a team rich in experience, knowledge and relationships. Our people have expertise in every aspect of Kumil Energy Limited's business, including ethanol and sugar cane production, customer service, public policy and government relations, farm management, commodities pricing, transportation logistics, finance, project development and corporate partnering.
